Docket No.: I432.131.101/P32351

Title: PROCESSOR ARRAY, FABRIC STRUCTURE, SURFACE-COVERING STRUCTURE AND
METHOD OF TRANSMITTING ELECTRICITY (As Amended)

IN THE ABSTRACT

Please replace the Abstract with the following rewritten paragraph:

Disclosed is a processor element comprising including a plurality of power supply interfaces, a plurality of power supply switches, and a fault-testing unit for testing whether a short-circuit to a connected adjacent processor element has occurred at a power supply interface. The respective power supply switch is closed in case no short-circuit has occurred such that electricity can be fed to the respective power supply interface.
